Profile

Java developer with experience building microservice and high-load systems. Specialized in backend services, distributed systems, and external API integrations.
Currently working on the Sber Business Profile platform — a centralized customer database for Sberbank and its ecosystem.
Co-founder and technical lead of Fastact — a SaaS platform for intelligent legal case search using AI technologies.

Education

Peter the Great St. Petersburg Polytechnic University   09.2020 – 06.2024
Bachelor's Degree, Software Engineering, GPA: 4.8/5.0   *Saint Petersburg, Russia*

ITMO University   09.2024 – present
Master's Degree, Business Information Systems, GPA: 4.2/5.0   *Saint Petersburg, Russia*

Additional Education

Course "High-Load Java Applications Development"
VK Educational Center at Polytechnic   09.2022 – 02.2023

Experience

Fastact | Co-founder / Technical Lead   04.2025 – present
- Designed the architecture of a SaaS platform for intelligent legal case search using AI technologies
- Developed backend and frontend components of a microservice platform and implemented service integration via REST API and gRPC
- Implemented a semantic search RAG module using ChromaDB
- Developed a reactive chat service using Spring WebFlux, WebClient, ReactiveMongo and Reactive gRPC
- Implemented a payment service integrated with the YooKassa payment provider
- Configured a full CI/CD pipeline, monitoring and alerting system (Prometheus, Grafana)
- Led a development team of 7 engineers: task planning, code reviews, and development process organization
- Project received a 1 million rubles grant from the Innovation Promotion Foundation under the "Student Startup" program

Sberbank / Bell Integrator | Java Developer   09.2024 – present
- Developed backend services and REST APIs for a client profile management system for the Global Markets Department
- Optimized processing and transfer of files through the Federal Tax Service API using multithreading
- Implemented a distributed rate limiter using Hazelcast with a headless service for pod coordination
- Performed dependency audits and upgrades to eliminate vulnerabilities (CVE) and applied security fixes
- Participated in system modernization including migration to Java 17 and Spring Boot 3

Bercut Ltd. | Java Developer   07.2023 – 08.2024
- Developed End-to-End automated tests for a billing system used by Tele2
- Refactored the testing framework, developed unit tests and analyzed Allure reports
- Developed the *LogRunMan* Maven library for collecting and analyzing test execution data
- Integrated and tested services using SOAP and REST APIs

Sreda Solutions | Software Engineering Intern   06.2023 – 07.2023
- Participated in backend development of software based on V2X technology
- Developed unit tests and prepared technical documentation
- Developed a bash script using the GitLab API to collect project information

Skills

Programming Languages: Java, SQL, Python, TypeScript
Технологии: Spring Boot, PostgreSQL, MongoDB, JUnit, Mockito, Redis, Kafka, gRPC, REST API, Docker, Kubernetes, Hibernate / JPA, Prometheus, Grafana, Maven, Jenkins
